Member of the public thanked councillors for submitting further objections to the planning inspectorate regarding planning reference ZG2025/0338/FUL Land Off Carrs Meadow however still expressed concerns that some elements were missed with regards to the land being a 'village green'. Councillors explained to the resident that although the land has been used for various events with permission from the landowner, the land is not part of the village green lease and is owned by the applicant, and it would have been wrong to mislead the planning inspectorate in this way. It was also disputed that the Parish Council has not represented the views of the majority of residents on Carrs Meadow as claimed by the resident present. Full representation was demonstrated in the lengthy objections made to both North Yorkshire Council planning department and the planning inspectorate.

Maintenance

26048: Maintenance issues:

- No new maintenance issues reported.
- No progress on getting the bus shelters cleaned on the A19 near Sang Thai. Clerk has contacted Cllr Vassie (Ward Cllr for Deighton area) and Cllr Cattanach again. No progress.
- Overgrown hedges adjacent to two properties on the east side of the A19. The resident has cut back the hedge. Councillors considered options for the verge clearance. Clerk to contact NYC to request that the path is reinstated and cleared due to it being very narrow to walk on next to the busy road and safety issues. Concerns also raised that wheelchair users would not be able to use this path safely.
- Request sent to NYC to grit specific pavements in the village particularly Carr Lane and Main Street. New requests for gritting routes are held in August and September. Highways have explained that it is unlikely that the area will be added to the route as the road would need to be reclassified. Carr Lane is priority 3 route and the existing service provision for gritting complies with the Council's winter maintenance policy.
- Report of drainage problems and excess water causing damage to properties on the A19 outside numbers 7 and 9. NYC Highways have responded and confirmed that all gullies in this vicinity lead into the Yorkshire Water combined system which runs from the A19, then follows down Main Street, crosses Carr Lane and goes into the pumping station. The issue is not the highway drainage system but unfortunately the Yorkshire Water combined system that becomes overwhelmed during rain events. Unfortunately, NYC do not set Yorkshire Water priorities for asset improvements so they suggested that those affected contact them direct to complain as it may escalate the matter for works to be carried out. Councillors resolved to contact Yorkshire Water to investigate. With regards to the water damage to the properties, it was suggested that residents should get a professional assessment to ascertain where the water is getting into their properties and investigate ways of preventing it on the building such as a deflector plate on the airbrick or a more weatherproof door.
